

Accounts

➔ By leveraging the exceptional analysis and reporting capabilities of Infor FMS SunSystems v4 Accounts, CFOs can understand and manage the business like never before.

Do business better.

In addition to their traditional responsibilities of collecting, measuring, and analyzing data from the finance and accounting process, today's CFOs are increasingly under pressure to act as strategic advisors and internal business consultants. To do so, they must:

- Keep in mind the latest compliance requirements, technology, and working practices around the globe.
- Make sure their systems provide full transparency and control over all operations.
- Choose tools that drive down organizational costs while providing maximum ROI and the lowest total cost of ownership over the long run.
- Ensure their internal processes are as efficient and consistent as possible.

Leverage experience.

Infor™ FMS SunSystems v4 Accounts is a system that addresses the needs of today's finance office. A single, integrated ledger combines the functionality of general ledgers, sales and purchase ledgers, project ledgers, cash books and user-defined ledgers, providing a powerful, real-time financial transaction processing engine. Using this powerful solution, CFOs can immediately see the impact of any financial posting, giving them greater visibility into the business.

With more than 20 years of experience built in, Infor FMS SunSystems v4 Accounts has become the financial management solution of choice for companies around the globe.

Get business specific.

Infor FMS SunSystems v4 Accounts delivers integrated general ledger, payable and receivable ledger functions, plus fixed asset accounting and corporate allocations for rules-based redistribution of costs and other values. Financial modules include:

Accounting—provides analysis setup and management, audit control, automatic consolidation and budget management, daybook setup and listing, comprehensive tax management and reporting, and more:

- Flexible journal and account listing.
- Ledger balances, entry management, and descriptions for every transaction.
- Multiple due dates for staged payments.
- Payment controls, forecasting, and split terms.
- Reporting by current/future/prior periods/quarters/years.
- Project costing and reporting; withholding tax calculation.
- Rough numbers for countries requiring preliminary postings.
- Settlement discount terms for individual transactions.
- Transaction allocation and transfer.
- Trial balance by day/week/period.
- Highly flexible coding structures.

Asset Register—enhances the solution by offering:

- Complete asset management.
- Budgeting, forecasting, and taxation values.
- Diary system for enhancement, disposal, and part disposal.
- Dual currency asset value.
- Full audit reports; online ledger updates.
